Bio-reaction tubes offer a convenient and economical option for small scale, high density suspension cell culture. Ideal for biological reaction applications and free gas exchange. Aseptic conditions maintained through 0.22µm hydrophobic vented membrane. Useful in the screening and optimization processes of suspension cells. Reaction parameters can be optimized using small amounts of materials, maximizing the number of parallel experiments that can be performed simultaneously. Ideal for suspension cell culture, bacterial growth, seeding larger bioreactors, supporting start-up testing procedures for larger bioreactors, and lyophilization. Easy to read black graduations and a large white marking area. RNase/DNase free and non-pyrogenic. Max force (RCF) g 16000. Every case is printed with the lot number for quality traceability. Packaged sterile, 10/re-sealable bag, 100/case. Vendor Catalog # 229479 This item is being sold as 100 each per case	160.08	160.08

cell lysis and neutralization. The Zyppy Plasmid Miniprep Kit is the fastest and easiest method available to separate plasmid DNA from E. Coli efficiently. The plasmid DNA is high quality, endotoxin-free, and well suited for use in transfection, bacterial transformation, restriction endonuclease digestion, DNA ligation, PCR, transcription, sequencing, and other sensitive downstream applications.

132	1	EA	NC9163256	DNA CLEAN AND CONC-25 200 PREP	276.20	276.20
-----	---	----	-----------	--------------------------------	--------	--------

It can also be used for post-RT cDNA clean-up and purification of sequencing-ready DNA from M13 phage. Simply add the specially formulated DNA Binding Buffer to your sample and transfer the mixture to the supplied Zymo-Spin® Column. There is no need for organic denaturants or chloroform. Instead, the product features ZymoSpin column technology to yield DNA that is free of salts and contaminants in just 2 minutes. The purified DNA is ideal for DNA ligation, sequencing, labeling, PCR, microarray, transfection, transformation, and restriction digestion procedures.
Vendor Catalog # D4006

133	1	EA	NC1375332	URANYL ACETATE 100ML	57.20	57.20
-----	---	----	-----------	----------------------	-------	-------

Uranyl acetate is extensively used as a negative stain in electron microscopy. 1% uranyl acetate solutions is used as an indicator, and at stronger concentrations in analytical chemistry, as it forms an insoluble salt with sodium (the vast majority of sodium salts are water-soluble). Uranyl acetate solutions show evidence of being sensitive to light, especially UV, and will precipitate if exposed.
