-----	---	----	------------	---------------------------	--------	--------

CELLTREAT Scientific Products 50mL Bio-reaction Tube Self Standing.  
 Bio-reaction tubes offer a convenient and economical option for small  
 scale, high density suspension cell culture. Ideal for biological  
 reaction applications and free gas exchange. Aseptic conditions  
 maintained through 0.22µm hydrophobic vented membrane. Useful in the  
 screening and optimization processes of suspension cells. Reaction  
 parameters can be optimized using small amounts of materials,

maximizing the number of parallel experiments that can be performed simultaneously. Ideal for suspension cell culture, bacterial growth, seeding larger bioreactors, supporting start-up testing procedures for larger bioreactors, and lyophilization. Easy to read black graduations and a large white marking area. RNase/DNase free and non-pyrogenic. Max force (RCF) g 16000. Every case is printed with the lot number for quality traceability. Packaged sterile, 10/re-sealable bag, 100/case.

144	1	EA	50 444 186	<p>ZYPPIY PLASMID MINIPREP 400RXN Zyppy® Plasmid Miniprep Kit is the fastest and simplest method available to efficiently separate plasmid DNA from E. coli. Simply add the uniquely formulated 7X Lysis Buffer directly to your bacterial culture, neutralize, then purify using our Fast-Spin column technology (alternatively, the samples may be processed by the classical centrifugation method). Additionally, the innovative colored buffers included in the kit permit error-free visualization identification of complete bacterial cell lysis and neutralization. Zyppy® Plasmid Miniprep Kit is the fastest and simplest method available to efficiently separate plasmid DNA from E. coli. The plasmid DNA is of the highest quality, is endotoxin-free, and is well suited for use in bacterial transformation, restriction endonuclease digestion, DNA ligation, PCR, transcription, sequencing, and other sensitive downstream applications. An overview of the purification procedure is shown to the right.</p>	307.38	307.38

146	1	EA	NC1375332	1% URANYL ACETATE 100ML	49.20	49.20
-----	---	----	-----------	-------------------------	-------	-------

Uranyl acetate is extensively used as a negative stain in electron microscopy. 1% uranyl acetate solutions is used as an indicator, and atitrantin stronger concentrations in analytical chemistry, as it forms an insoluble salt with sodium (the vast majority of sodium salts are water-soluble). Uranyl acetate solutions show evidence of being sensitive to light, especially UV, and will precipitate if exposed.
