93.11 93.11

Simply add the specially formulated Agarose Dissolving Buffer (ADB) to the gel slice containing your DNA sample, let dissolve, and then transfer to the supplied Zymo-Spin™ Column. There is no need for organic denaturants or chloroform. Instead, the product utilizes Fast-Spin column technology to yield high-quality DNA in just 15 minutes. DNA purified using the Zymoclean™ Gel DNA Recovery Kit is perfectly suited for use in DNA ligation reactions, sequencing, DNA labeling reactions, PCR, etc.

131 1 EA 50444186 ZYPPY PLASMID MINIPREP 400RXN 367.56 367.56

The Zyppy Plasmid Miniprep Kit features a pellet-free modified alkaline lysis system that bypasses the normal cell-pelleting and resuspension steps common to classical plasmid preparation procedures. Simply add the uniquely formulated 7X Lysis Buffer directly to your bacterial culture, neutralize, and then purify with Zymo-Spin column technology. Additionally, the patented colored buffers included in the kit allow for easy visualization of complete cell lysis and neutralization. The Zyppy Plasmid Miniprep Kit is the

It can also be used for post-RT cDNA clean-up and purification of sequencing-ready DNA from M13 phage. Simply add the specially formulated DNA Binding Buffer to your sample and transfer the mixture to the supplied Zymo-Spin™ Column. There is no need for organic denaturants or chloroform. Instead, the product features ZymoSpin column technology to yield DNA that is free of salts and contaminants in just 2 minutes. The purified DNA is ideal for DNA ligation, sequencing, labeling, PCR, microarray, transfection, transformation, and restriction digestion procedures. Vendor Catalog # D4006

133 1 EA NC1375332 URANYL ACETATE 100ML 57.20 57.20

Product Image not available from Supplier

Uranyl acetate is extensively used as a negative stain in electron miroscopy. 1% uranyl acetate solutions is used as anindicator, and atitrantin stronger concentrations inanalytical chemistry, as it forms an insoluble salt withsodium(the vast majority of sodium salts are water-soluble). Uranyl acetate solutions show evidence of being sensitive to light, especially UV, and will precipitate if exposed.
