136	1	CS	50 202 015	50ML BIORXN STANDING TUBE CELLTREAT Scientific Products 50mL Bio-reaction Tube Self Standing. Bio-reaction tubes offer a convenient and economical option for small scale, high density suspension cell culture. Ideal for biological reaction applications and free gas exchange. Aseptic conditions maintained through 0.22µm hydrophobic vented membrane. Useful in the screening and optimization processes of suspension cells. Reaction parameters can be optimized using small amounts of materials, maximizing the number of parallel experiments that can be performed simultaneously. Ideal for suspension cell culture, bacterial growth, seeding larger bioreactors, supporting start-up testing procedures for larger bioreactors, and lyophilization. Easy to read black graduations and a large white marking area. RNase/DNase free and non-pyrogenic. Max force (RCF) g 16000. Every case is printed with the lot number for quality traceability. Packaged sterile, 10/re-sealable bag, 100/case. Vendor Catalog # 229479	147.80	147.80

144	1	EA	50 444 186	<p>ZYPY PLASMID MINIPREP 400RXN</p> <p>The ZypPy Plasmid Miniprep Kit features a pellet-free modified alkaline lysis system that bypasses the normal cell-pelleting and resuspension steps common to classical plasmid preparation procedures. Simply add the uniquely formulated 7X Lysis Buffer directly to your bacterial culture, neutralize, and then purify with Zymo-Spin column technology. Additionally, the patented colored buffers included in the kit allow for easy visualization of complete cell lysis and neutralization. The ZypPy Plasmid Miniprep Kit is the fastest and easiest method available to separate plasmid DNA from E. Coli efficiently. The plasmid DNA is high quality, endotoxin-free, and well suited for use in transfection, bacterial transformation, restriction endonuclease digestion, DNA ligation, PCR, transcription, sequencing, and other sensitive downstream applications.</p> <p>Vendor Catalog # D4020</p> <p>Hazardous Material</p> <p>This item is being sold as 1 per each</p> <p>List Price: 403.00 CDC: 053</p>	335.70	335.70

146	1	EA	NC1375332	1% URANYL ACETATE 100ML	51.60	51.60
-----	---	----	-----------	-------------------------	-------	-------

Uranyl acetate is extensively used as a negative stain in electron microscopy. 1% uranyl acetate solutions is used as an indicator, and at stronger concentrations in analytical chemistry, as it forms an insoluble salt with sodium (the vast majority of sodium salts are water-soluble). Uranyl acetate solutions show evidence of being sensitive to light, especially UV, and will precipitate if exposed.
