tRNA Scan SE

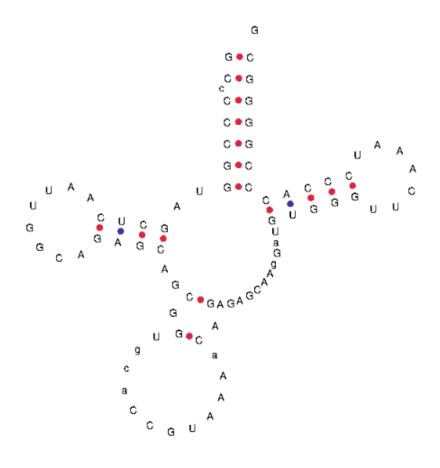

Start: 6057

End: 6138

Anti-codon: Undetermined

Infernal Score: 45.8

Isotype score: 50.8

If you look at the bp downstream of the "G" listed on the 3' end, they are CATACG

bp 6139

So, I was thinking that we cut it at 6139, as after that "C", it deviates from the CCA sequence.
