

Cluster EE starts and protein calls.

Note that the start choice are relative to the Starterator report. However, once processed this will be easy to see in the comparative data.

6/17/22

Gene	Start (according to starterator start choices)	Function
1	Start 3	HP
2	Start 4	HP
3	Start 1	terminase
4	Start 20	portal protein
5	Start 2	major capsid and protease fusion protein
6	Start 2	head-to-tail adaptor
7	Start 2	tail terminator
8	Start 2	major tail protein
9	Start 3	HP
10	Start 6	tail assembly chaperone
11		tail assembly chaperone
12	Start 18	tape measure protein
13	Start 1	minor tail protein
14	Start 1	minor tail protein
15	Start 7	minor tail protein
16	Start 5	HP
17	Start 9	endolysin
18	Start 6	membrane protein
19	Start 5	membrane protein
20	Start 50	Lsr2-like DNA bridging protein
21	Start 6	helix-turn-helix DNA binding protein
22	Start 5	helix-turn-helix DNA binding protein
23	Start 3	HP
24	Start 10	helix-turn-helix DNA binding protein
25	Start 9	HNH endonuclease
